About High Rise

Company Highlights

High Rise Fire Protection was founded in 1991 as a fire alarm, maintenance, and service company. We specialize in the installation, service and maintenance of fire alarm and security systems. We are a privately held, small business concern.

Special Expertise

At High Rise, we've built our company – and our reputation – on our thorough up-to-the-date knowledge and expertise in local code requirements. For our clients, compliance is no longer a concern. We make it ours.

But High Rise delivers more than expertise. We know that true excellence in fire protection and security is a long-term, constant challenge. That's why we become "partners in protection" with the clients we serve. That simply means we take the time to learn your business and your building. And anticipate needs rather than merely reacting to a crisis. This partnership approach enables us to design and provide systems that are tailored to meet your specific needs.

High Rise Fire Protection is a New York City based corporation with extensive knowledge and experience in providing life safety systems throughout the tri-state area.

Our corporate offices are located at **144 21st Street, Brooklyn, New York 11232** and reached by telephone at **718-369-3434**, or by fax at **718-369-0375**. We have an alternate sales office located at **995 Fulton Street, Farmingdale, New York 11735** and can be reached by telephone at **631-249-4100**, or by fax at **631-249-4104**.

High Rise Fire Protection is a strategic partner with Edwards Systems Technology which was recently acquired by GE Infrastructure. As part of the GE Infrastructure channel partner network we are able to offer innovative technology with endless opportunities for elegant and sensible building life safety solutions. This technology and application flexibility is what has brought us to the forefront of our industry.

Fire Alarm Systems

High Rise Fire Protection specializes in the installation, service and maintenance of fire alarm systems within the New York City area. Our primary line of fire alarm systems is manufactured by GE (EST). Whether your facility is a small commercial building, or a large high rise building in the heart of New York City, High Rise Fire Protection can design, install, and provide ongoing maintenance on your life safety systems. Regardless of the size of your building, we have just the right system for you.

Security Systems

We believe the most important advantage of owning a security system from High Rise is the convenience afforded by our totally integrated product line manufactured by GE which includes card access and camera surveillance. By combining our access control capabilities with the most sophisticated line of security ID cards and digital imaging systems on the market, High Rise is truly a single-source security identification provider.

All of our ID systems can be seamlessly integrated, assuring that your access control program is not only perfectly tailored to your business, but fully supported for maximum performance.

Service

Constant Assurance

Whether maintenance is mandatory or part of an in-house program of quality control, High Rise offers comprehensive programs that can be tailored to your organization's requirements. Our knowledge of systems and extensive testing experience enable us to offer these services with efficiencies that reduce costs without compromising your building's integrity.

24 Hours, 365 Days

Our commitment to a "partnership in protection" is most evident in our on-call expert service. While emergencies can never be anticipated, the resources and personnel needed are always ready to respond quickly and effectively. It is this readiness and professionalism that has made our clients our greatest sales representatives. Most new High Rise clients are referred to us by existing customers who have seen the proof of our excellence in service.
